PROFILE

Designing since 2018: freelance web, graphic and social design first, then SaaS product work at AbroadWorks since 2024. I build and keep design systems, run user research and usability tests, and take screens from wireframe to high-fidelity. Layout, type, colour and motion are where I spend my time, mostly on the small things: spacing, timing, how something settles when you tap it. I also led how my team used AI (Claude, ChatGPT) to move faster through design and research.

EXPERIENCE

UI/UX Designer, AbroadWorks Feb 2024 - Present

Remote · SaaS

- Designed and refined an AI-enhanced applicant tracking system (ATS), making the candidate experience simpler and recruiter workflows faster.
- Built, maintained and expanded the design system, keeping UI patterns consistent as features grew.
- Used Claude and ChatGPT for personas, wireframes, high-fidelity mockups and interface iteration; led how the team adopted AI in design and research.
- Ran user research, usability testing and prototyping to back design decisions with evidence.
- Worked daily with engineers, PMs and stakeholders across time zones, using Figma and Notion for async reviews.

Freelance Designer 2018 - 2024

UI/UX, web, graphic design & social media

- Designed and built client websites in Webflow and Framer.
- Made brand identities and marketing material: logos, social assets, pitch decks, brochures and packaging.
- Designed and illustrated campaign and digital ad assets to fit each client's goals and audience.
- Ran social media for small businesses: content planning, posts and audience engagement.

EDUCATION

Pamantasan ng Lungsod ng Maynila 2019 - 2022

BS Business Administration, major in Business Economics · **Magna Cum Laude**

Jose Rizal University

Junior & Senior High School · CSS & Animation Club President · SSG VP Internal
